Applications Developer

With 5 years of experience in Penetration Testing, leading a team to improve cyber threat identification and mitigation in diverse data systems.

WORK EXPERIENCE

Warner Bros. Discovery • Burbank, CA

Apr 2019 – Jun 2024

Senior Security Analyst : Penetration Testing

- Collaborate with business leaders and information technology asset owners to oversee and coordinate third-party vendors of new and changing information systems before implementation. Generate vulnerability reports including recommended improvements and risk evaluations.
- Led a Penetration Testing team to a significant enhancement in enterprise-wide cyber threat identification and mitigation across diverse data systems, including: cloud (AWS, GCP, Azure, VPS), mobile, and television applications.
- Review and advise on inter-domain policy relationships for systems, applications and Warner Bros. Discovery's corporate network
- Implement a mentorship program that fosters team collaboration and builds out documentation, creating a more engaged and effective information security team.
- Review with system and application owner's security attributes to ensure business drivers for security are properly accounted for.
